

IN THE SPECIFICATION:

Please rewrite the paragraph on page 2, lines 19-23 as follows:

The marker nib (13) is mounted through the nib hole (112) of the cover (11) and has a tip (not numbered) and a refill end (131). The tip of the marker nib (13) extends out of the nib hole ~~(113)~~ (112) and has a rear end (not numbered). The refill end (131) of the mark nib (13) is integrally formed with the rear end of the tip and is mounted inside the front cavity (113) of the cover (11).

Please rewrite the paragraph on page 3, lines 11-19 as follows:

The cap (15) is mounted on the front end of the cover (11) and has a rear end (not numbered), a front end (not numbered), a neck (not numbered), multiple optional air passages (151) and a central cavity (152). The rear end of the cap (15) is mounted on the front end of the cover (11). The neck is formed around the cap (15) near the rear end of the cap (15) for convenient holding. The optional air passages (151) and the central cavity (152) are defined inside the cap (15). The central cavity (152) has an opening (not numbered) at the rear end of the cap (15). The optional air passages (151) extend completely through the cap (15). The central cavity (152) covers the tip of the marker nib (13) when the cap (15) is mounted on the front end of the cover (11).
